

## Riders Eye GPS Product Review

We all know that a GPS will help us locate the next restaurant stop or the next destination but there is another way to use GPS. Use the technology to locate your BIKE! No we aren't talking about you drinking too much and not remembering. We are talking protection and peace of mind in the face of the \*#% @##\* &!\$#% who think about stealing our bikes!

Last year the number of motorcycle thefts in America grew to an astounding 56,000 bikes. That's about six bikes an hour and approximately 370 million dollars in financial loss and impact. Worse yet, typical recovery rates are as low as 25-30%.

A real-time GPS-based security and tracking device provides you the advantage of protecting your assets. You can use GPS tracking for individual personal vehicle security or even for commercial purposes. Simply stated, if it's mobile, valuable and subject to theft or tampering you need protection.

If you are looking for that extra edge in protecting your ride, Try RidersEye™. It allows you to instantly locate and control your motorcycle vehicle with a simple click of the mouse. It has Real Time Location & Tracking! That means you can access the bikes location within 100 feet or so, as well as locate the direction and speed information. It even has the option to track rides for future planning.

The device is compact and discrete because you don't want someone easily finding the GPS device and removing or destroying it, yet also is easy to install and configure. It has a rugged design (vibration resistant and waterproof) and it won't drain the battery because it only draws 4mA. Real-time tracking that allows you to control the starter disable/enable feature and provides you with Maintenance Notifications to your cell phone

like a low battery notification, a fall-over sensor and towing/movement notification.

Best of all there are NO MONTHLY FEES! The purchase of a RidersEye™ covers the first year service plan. There are optional plans for you to choose from and they start as low as \$29.95 per year. Plus we are being informed that it can save \$\$\$ on your insurance! Check with your insurance agent to see how much this beauty can save you or contact Karen Diehl (513) 965-0003 our “go to person” here at RidinOn!

RidersEye™ GPS Tracking device is transferrable from motorcycle to ATV to Automobile or boat. So you can use it on all your vehicles! RidersEye™ utilizes a web-based control panel to instantly and accurately locate a RidersEye™ equipped vehicle from any web-enabled computer, smart phone or tablet.

When it comes to minimizing losses in theft or tampering situations, early warning is vital, and every second counts. In the unfortunate case of an actual theft, on top of instantly alerting the vehicle’s owner, RidersEye™ becomes an indispensable tool for aiding the police in a quick and effective recovery. With access to constantly updated address, speed and direction information, the RidersEye™ control panel helps authorities swiftly track down a stolen vehicle in order to recover it immediately and minimize the chances of crash damage or attempted disassembly.

There are even more features to this device than we can share with you here, but you can check it out on line at [www.riderseye.com](http://www.riderseye.com).
